Introduction

This Appendix contains result for the OECD baskets for each of the following services:

- Mobile Voice and Data – results for both residential and business pricing
- Fixed Broadband – results for both residential and business pricing
- Bundled Communication Services – – results for residential pricing only

Results are presented in USD., and focus on selected European countries, plus Georgia

Residential results are presented inclusive of VAT, and business results are presented exclusive of VAT

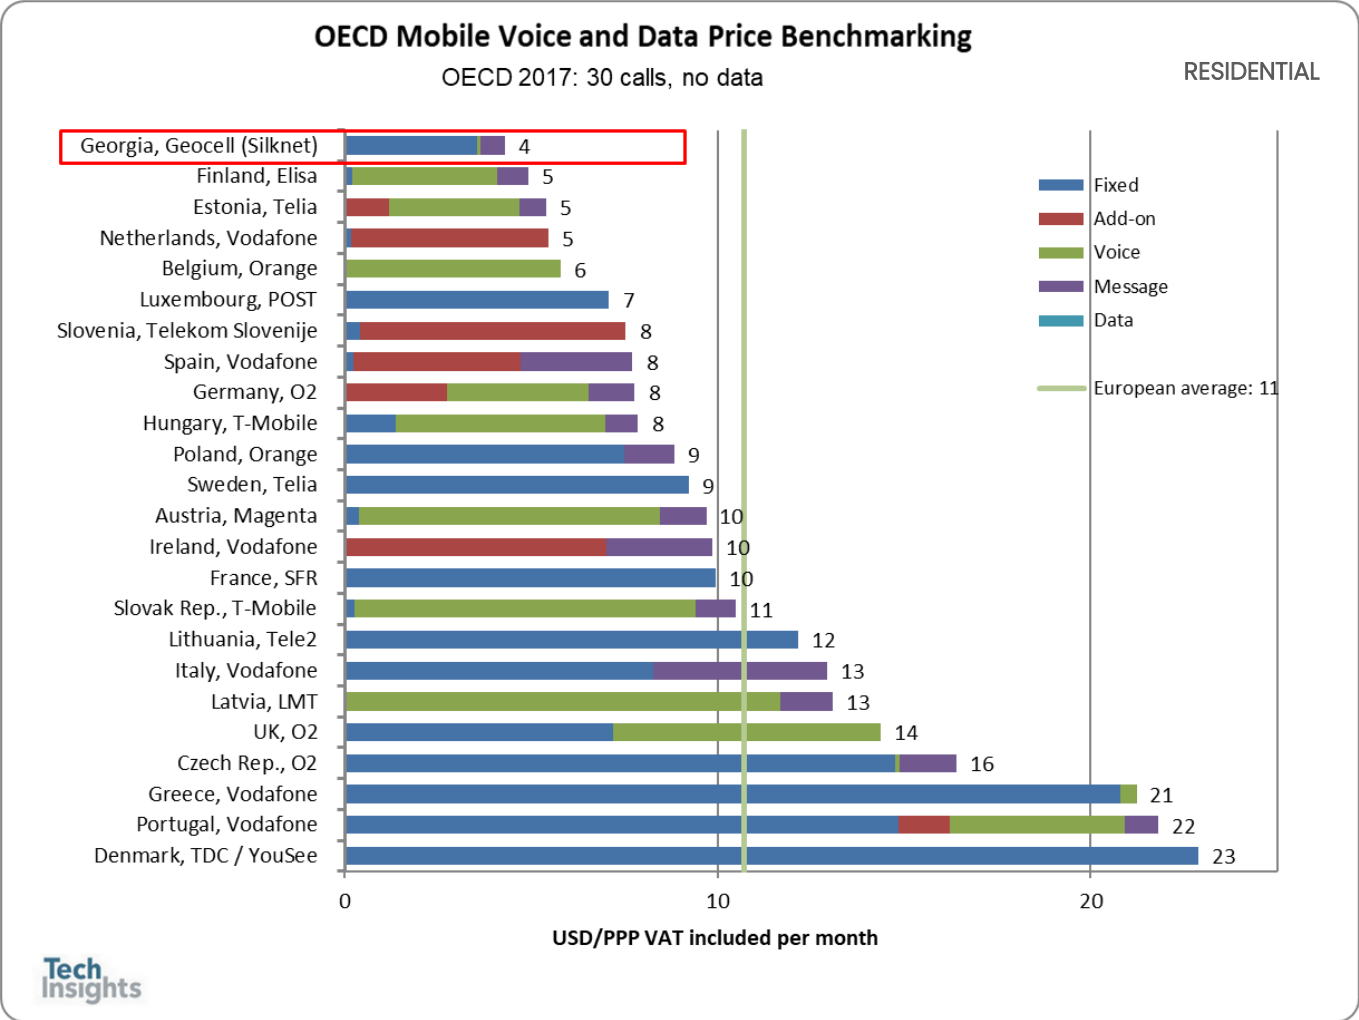

Results show the cheapest offer for each country.

- For fixed broadband and bundled communication services, Georgian providers offer regional pricing. In the results for these services, two sets of prices for Georgia are shown: the cheapest result Tbilisi, and the cheapest regional result (outside of Tbilisi)

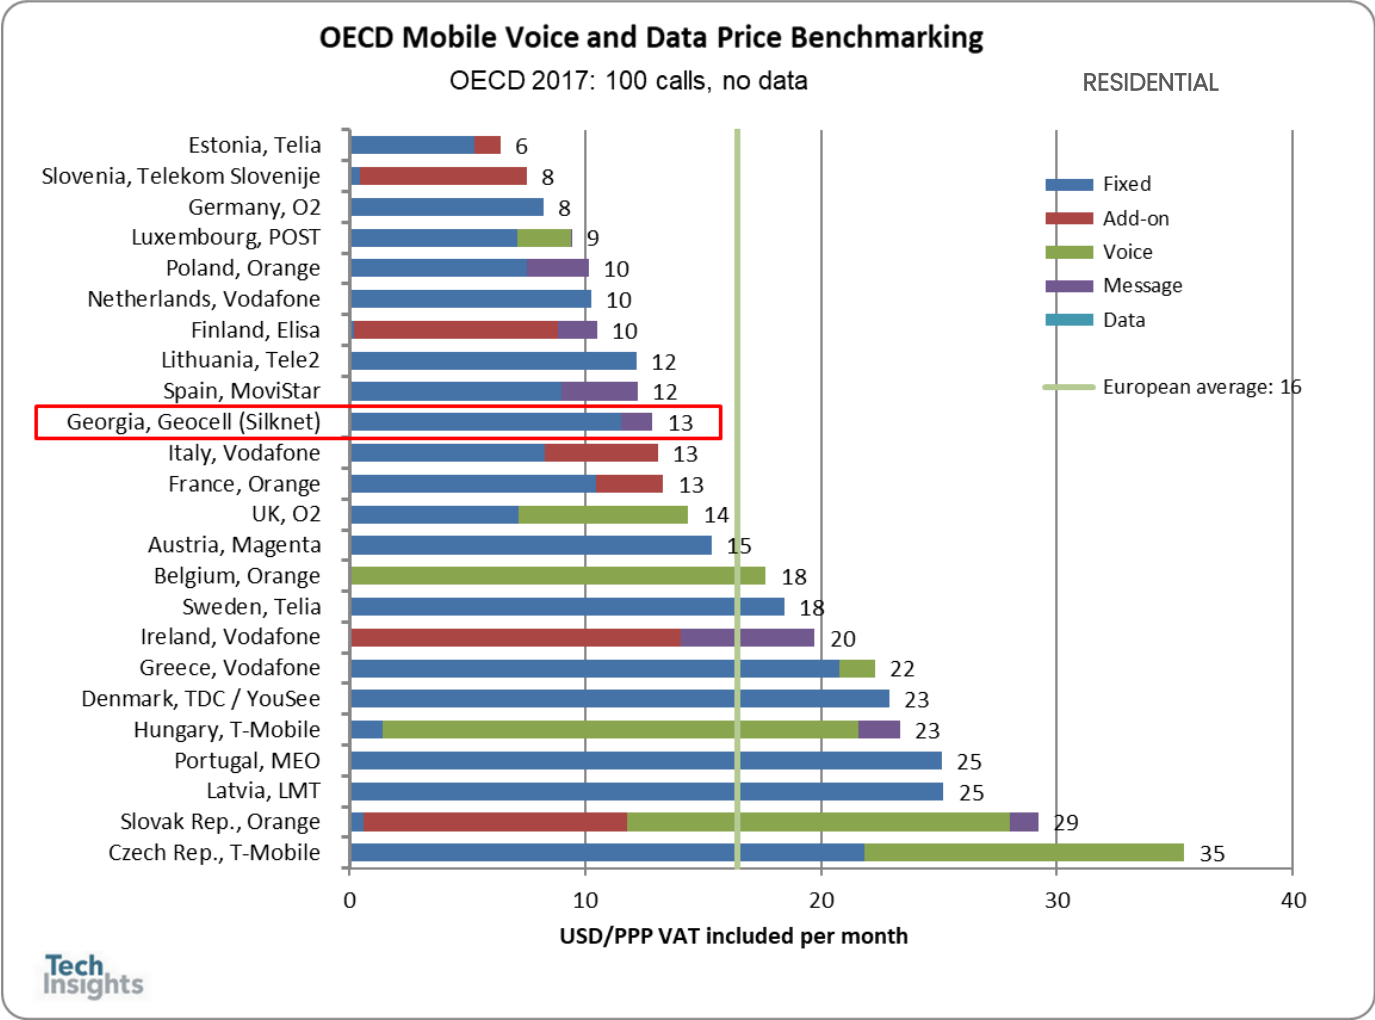

Only baskets that include results for Georgia are presented
